DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10, 11, and 14-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Houston et al. (WO 00/38591).

Concerning claims 10, 18, and 19, Houston et al. discloses conduit having integrally a helical formation (claim 6 of Houston et al.).

Concerning claim 11, Houston et al. discloses a helix angle as being between 5 degrees and 50 degrees (claim 8 of Houston et al.).

Concerning claims 14, 15, and 20, Houston et al. discloses a blood flow elongate member with a helical formation that effects a rotational flow of fluid within said member (page 2 paragraph 4).

Concerning claim 16, Houston et al. discloses inwardly extending portions in the elongate member (page 3 paragraph 4).

Concerning claim 17, Houston et al. discloses a helical formation adapted as an

insert to be mounted within a conduit (page 6 paragraph 5, continued on page 7).

Concerning claim 21, Houston et al. discloses that said blood flow member can compromise a graft (page 4 paragraph 2).

Concerning claim 22, Houston et al. discloses that said blood flow member can compromise a stent (claim 34 of Houston et al.).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Houston et al.

Concerning claims 12 and 13, Houston et al. discloses a helical range of 5 degrees to 50 degrees. It would have been obvious to one of ordinary skill in the art at the time of the invention to see that 5 degrees to 20 degrees and 8 degrees falls within the range discloses by Houston et al.

Allowable Subject Matter

6. Claims 1 and 5-9 are allowable over the prior art.

Response to Arguments

7. Applicant's arguments filed 06/09/2009 have been fully considered but they are not persuasive concerning claims 10-22. Independent claims 10 and 19 are apparatus claims and helical formation defined by the parameters given is still defined by those parameters whether they are taken into account prior to manufacturing or after, the numbers will define the apparatus regardless. And so the rejection stands for claims 10-22.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
